ERLead Integrated Lead Retrieval System

ILTS 21st Annual International Congress Lead Retrieval \$150 per exhibiting company

Using QR code and smartphone technology, ERLead provides an integrated solution for your lead retrieval needs.

As an exhibitor, you can purchase lead retrieval from within your booth record. Once you have purchased your booth online, simply log back into your record using the instructions in your email and click on the Resources tab to purchase lead retrieval for the conference!

Attendee badges include a QR code that allows you to scan and access only the contact information that the meeting planner wants to share.

- No Hardware Onsite! Free downloadable app works on iPhone and Android smartphones and provides significant savings vs. renting lead retrieval hardware
- Exhibitors purchase ERLead access online and then can start using the lead retrieval app immediately
- Quick scanning of attendee's QR code on badge
- Exhibitors access scan results via Excel spreadsheet reports through their booth registration record or the app itself.
